

PROJECT STUDY
EASTON AREA HIGH SCHOOL
**COTTINGHAM STADIUM
FIELD HOUSE RENOVATION**

Easton Area High School Athletics underwent major renovations including a new synthetic field, stadium seating, locker rooms, public restrooms, press box, and scoreboards.

Reynolds worked with the architect and general contractor, Skepton Construction, to design and install all new lockers in the home and away football locker rooms as well as the cheer locker room. One person was quoted as saying, “the Bob Rute Fieldhouse might be the envy of some college programs with updated, spacious locker rooms for both home and visiting teams.”

Home Lockers—The home team lockers were designed and manufactured to fit perfectly around the new locker room, creating lots of open space while still providing

Cheer Lockers—The cheerleaders locker room got a whole new set up like the home locker room with plenty of storage.

Away Lockers— Visiting teams will be treated to professional level locker facilities with nearly identical outfitting as the home team. No logos are used here but each locker has plenty of storage and a hasp lock to store valuable personal items.

Men’s and Women’s Referee Lockers—Referees will have their own space to get ready and store items with coat hangers, shelves, and hasp locks.

Coaches Lockers—Coaches will have similar lockers to referees with a little
