

PROJECT STUDY COTTON BOWL CLASSIC ATT STADIUM STORE ROOM RENOVATION

With 85 years of history, the Cotton Bowl needed to upgrade its storage area containing everything from past and present games — game day materials, historic documents, game balls, posters, trophies, clothing and much more. They wanted a solution that would give them more capacity in their current space.

Reynolds designed and installed a movable shelving solution that took advantage of their ceiling height and fit in the existing space. All while increasing storage capacity.

AT A GLANCE PROJECT BENEFITS

- High density movable carriages with heavy-duty shelving
- Custom fit to work in tall, narrow area
- Durable construction will withstand years of daily use
- Layout provides room for years of expansion
- Lifetime warranty on movable carriages
- Delivered on time and on budget

Reynolds Offers a Wide Selection of Solutions

- Movable Shelving
- Movable Pallet Rack
- Lateral Shelving
- Vertical Carousels
- High Density Drawers
- Mezzanines
- Pharmacy
- Healthcare
- Industrial

"I can't say thank you enough for the job you and the installation crew did for us on this project! One of the smoothest projects we have ever had in our long 85 years of history, and now we will put 85 years of history on those shelves.

Thanks so much for everything and we will definitely come back to you if we ever need anything else."

High density storage systems let you store up to 80% more items than typical rows of shelving and cabinets by eliminating the need for aisles. The designs are completely flexible allowing you to determine how much space you need and how to maximize the space you have. All systems are designed for you specific dimensions—height and length of storage units and length of carriages.

- Use new or existing shelving, pallet rack and storage units to mount on rails
- Options for manual, mechanical assist or electronic operating modes
- Movable and expandable for future needs (unlike other systems that are grouted to the floor)
- Easily adjustable floor levelers keep units operating smoothly even after new construction floors settle
- Highest quality rail systems manufactured to meet seismic regulations as well as a lifetime of flawless and smooth operation
